Hello, everyone! Today I'd like to introduce a famous place in the United States—the Brooklyn Bridge. It was built in 1883 and since then it has been quite popular, especially for the crazy things that people did on this bridge.

Let me give you two examples. In 1884, one year after the bridge opened, a man named Taylor took 21 elephants onto the bridge to see whether it could hold a lot of weight. In 1919, after the First World War, a pilot tried to fly a plane under the bridge. He made it and this funny trick didn't cause any damage.

New Yorkers love the site very much. Now, the bridge has become a landmark of New York City and it's also an outstanding architectural wonder of the world.
