**Welcome to the City Youth Club. Find out what's going on!**

Are you 10~18 years old? Open Monday to Friday, 5 pm~8 pm.

**Tell us here:**

I'm Emily. I like doing arts. We often paint pictures and make things at the club. We have a helper in the arts room. He's really nice. People talk to him about their problems.

I'm Sam. There's a skateboard park at the club and I love skateboarding. I don't have a skateboard, but that's OK. It has skateboards for people to use.

I'm Rose. I like rock climbing and there's a big climbing wall at the club. You can do rock climbing on Mondays and Wednesdays.

I'm Bob. There's a coffee shop and you can buy food and drink there. I help in the coffee shop on Fridays.

I'm Mark. I work at the club on Tuesdays and Thursdays. I'm a volunteer — I don't get money for my work. I like helping people.

51. Who paints pictures and makes things at the club?

- A. Sam.                      B. Bob.                      C. Rose.                      D. Emily.

52. When can you do rock climbing at the club?

- A. From Monday to Friday.                      B. From Tuesday to Thursday.  
C. On Mondays and Wednesdays.                      D. On Tuesdays and Thursdays.

53. What does Mark like to do at the club?

- A. Help people.                      B. Sell food.                      C. Make money.                      D. Go skateboarding.

B

Last year I had a trip with my friend, Nancy. The weather was cloudy except for one night. Nancy and I sat in the field and we felt relaxed. We talked about the fantastic trip, looking at the stars. "It's a pity we don't know which stars we're looking at, Jenny," said Nancy. "I know some of them," I answered. Nancy felt surprised when I finally finished telling her all the names I knew.

My interest in stars began when I was eight. My aunt took me to a planetarium (天文馆). A guide showed us the groups of stars and told us stories about how they got their names. The stories were wonderful.

Everyone knows we can see the stars better when it's not cloudy, but lots of people don't realize that a bright moon also stops us seeing very much. I always look for the Plough (北斗星), because once I see that, I can find the North Star and other stars.

I wanted to learn more about the stars, so I took a course at the club. There are so many lights in the city that we have to go into the countryside to see any stars. I'm planning to make videos about stars in the countryside. I'll post them online for everyone to watch. My greatest dream is to be an astronaut (宇航员) and I wish I could have a space travel.

54. How did Nancy feel after Jenny told her the names of stars?  
 A. Relaxed.                      B. Surprised.                      C. Angry.                      D. Wonderful.
55. What is Jenny planning to do?  
 A. Have a space travel.                      B. Take courses online.  
 C. Make videos about stars.                      D. Give a talk about names.
56. Which of the following would Jenny probably agree with?  
 A. Students should move to the countryside.  
 B. Children's favorite hobby is to write stories.  
 C. The best place to watch stars is the city center.  
 D. A bright moon may stop people seeing very much.

Presentation (展示) skills are important at school and in other areas of life. Some people don't like giving presentations because they don't know what to say or because they get nervous about public speaking. Here's some advice to help you make presentations easier and more enjoyable.

**Use photos or videos**

Try to use photos or videos. These things make your performance more exciting and help you remember what you're going to say. However, you shouldn't use too many. The "star" of your presentation should be you, not your photos or videos.

**Connect with your audience (观众)**

Always look at the audience when you speak. Stand up straight, but don't stand still or move around much. Finally, be sure to thank your audience when you finish speaking. It's a simple but good way to end any presentation.

**Get organised**

The best presentations are well planned and clearly organized. Think about topics (话题) and choose a proper one. In one topic, three or four main ideas will be fine. The beginning of your presentation should be interesting. For example, you can tell a short, funny story to make people laugh.

**Practice before your performance**

You need to practice many times before the "big day". Practice saying any unusual words. Then write the main ideas on small cards to help you remember. Practice in front of a mirror and time your presentation. Finally, you can record your performance or ask a friend to watch you and then make suggestions for improvements.

C

57. How can you interest your listeners at the beginning?  
 A. By listing your ideas.                      B. By telling a funny story.  
 C. By standing up straight.                      D. By saying simple words.
58. Which is the "big day" according to the text?  
 A. The day you prepare videos.                      B. The day you get some advice.  
 C. The day you visit your friends.                      D. The day you make a presentation.

IX. 任务型阅读 (共 5 小题; 每小题 2 分, 满分 10 分)

阅读下面短文, 按要求完成 66~70 题。

"I could tell it was him by the way he walked." If you've ever said that, you understand biometrics (生物识别技术). Biometric technology is an important topic in our work and private lives. It includes the use of finger prints or knowing a person's voice. It is the science about what a person looks like and how a person does things. Like tree leaves, no two human beings are exactly the same. They've got different eyes and different hair. And everyone has a different way of walking or moving.

This technology can tell you from others. At the moment if you travel through an airport, you need your ID card or passport. If you go to your bank to get some money, you need a card and a special number. But what should you do if you lose your passport or forget your number? Biometric technology can solve this problem. The technology is becoming more and more popular with old people because they no longer need to remember their passwords (密码).

This technology is all around us in our life. We use them to unlock a smart phone, get into our homes, start our cars without a key or even pay for our shopping.

Nothing is perfect. People are worried about the safety of their private information. However, the technology will become much better in the future, and it will become more and more important in our daily life.
