As a biologist and photographer, I always take my camera everywhere to take pictures of wild animals. One day, I was standing on a boat when a very large female leopard seal(海豹) swam by. I put on my diving equipment and grabbed my 1. I was frightened because she was so big. My mouth was dry, and I couldn't even 2. But I knew it was time to 3 this mysterious creature.

I jumped into the freezing water. Immediately, the seal swam towards me. Then she put my entire camera and much of my head into her mouth. Thinking this must be a sign of 4, I decided to stay very calm. Although the seal was showing me her teeth, I tried not to 5 any fear. She did it a few more times, and then swam away. To my 6, she came back with a live penguin. And she even showed me how to eat it. Then she pushed the penguin into my camera—she thought the camera was my mouth!

Being a biologist, I understood that she was trying to 7 me. But I thought that she was really trying to communicate with me. At this point, she didn't seem very 8. She stayed by me and took care of me for four days.

I got many amazing pictures during those four days. And, more importantly, I've learned that animals do not always behave the way we 9. I believe the 10 experience I had with this powerful and intelligent animal will stay with me forever.

In my eyes my mother is capable of doing anything, especially chores such as ironing and cooking. However, teaching her how to use the Internet is as frustrating as untangling(解开) wires.

Once, my mother came to me to ask for help on how to find a recipe for all-beef Lasagna. I gave her very simple verbal(口头的) instructions—go to the home page of a particular search engine and type in “recipe for all-beef Lasagna.” Fifteen minutes later, she came to me, telling me that she was unable to find the Internet icon(图标). I went over to the computer and pointed out the icon to her.

Another fifteen minutes went by when I felt a tap on my shoulder. This time, my mother said that she was unable to search for the particular recipe. Gritting(咬) my teeth, I walked to her room again. I saw that she had typed “all beef La saga” instead. With frustrated strokes, I keyed in the correct spelling.

Yet another fifteen minutes went by again when my mother gingerly tapped my shoulder. I stormed next door without bothering to hide my frustration. The main page of the website had not shifted one bit. I then realised that she did not know how to scroll down the page. What had initially seemed like an easy task was turning out to be an intense one.

To avoid being disturbed again, I decided to find the recipe for her. Without a word, I rapidly downloaded a few recipes, printed them out and passed them to my mother. However, seeing her embarrassment, I began to regret my impatience during the whole process.

At that moment, memories flashed through my mind. When I was young, my mother endured my endless questions, enlightening me with much patience. Now that I am older, the roles slowly reverse. As my mother may increasingly need my help, shouldn't I rethink how to respond to her needs?

24. The author's mother couldn't find the recipe online mainly because she was _____.

- A. unfamiliar with computers and the Internet
- B. given unclear instructions by the author
- C. too dependent on her family members
- D. impatient at searching for the recipe

25. Why did the author print the recipes for his mother at last?

- A. Because he was pleased to help his mother out.
- B. Because he didn't want his mother to be embarrassed.
- C. Because he was fed up with his mother's interruption.
- D. Because he thought his mother favored the printed version.

26. What message does the author want to convey?

- A. It is wise to teach others by examples.
- B. Forgiving others is equal to blessing oneself.
- C. Patience and perseverance will be finally rewarded.
- D. Putting yourself in others' shoes is the key to understanding.

C

The technology for speech-recognition systems has advanced greatly since its appearance in the 1950s. Many voice systems can understand the language when spoken at a normal conversational rate. But even the advanced human-machine interfaces(人机交互) used today are unable to trick the listeners into thinking a computer is a human. Why is this? Simply put, it's because human beings rely on more than words to convey ideas or interpret messages, such as tones, facial expressions, body movements, and objects in the world around them.

One significant recent achievement in the field of talking computers is virtual personal assistants (VPAs) on mobile phones. If you tell a mobile phone VPA that you want to schedule a lunch with a friend, it can set the appointment in your phone in seconds. The VPA can also hold a basic “conversation” and has earned fame for its elementary sense of humour. Still, the humour is preprogrammed and can be triggered only when human users speak certain key words.

While the potential for “real” communication between a human and a machine may seem exciting, this possibility concerns some people. Some experts worry about people’s attachment to these machines and fear that the art of successful human-to-human conversation will be undeveloped in younger generations. They worry that people won’t be able to display the right emotion or tone in conversations because they haven’t been practising those skills. Others fear that machines will take over functions that were traditionally performed by humans, such as customer service. Another concern often associated with the development of new technology is the invasion of privacy(侵犯隐私). When people use certain speech-recognition applications, they leave behind an audio track of their speech. When you ask a VPA for directions, your speech is sent and saved to a remote server for processing. This digital trail may lead to data mining, or the collection of large quantities of personal data.

For now, however, the continuing evolution of speech-recognition software is worth expecting. Leading companies in the field hope to make human communication with machines as seamless as possible, just like communicating with another human.

27. According to the passage, what can a VPA do?

- A. Entertain users with original jokes.
- B. Make people regard it as a human.
- C. Hold preprogrammed conversations.
- D. Display the right tones in conversations.

28. Which situation reflects the concerns mentioned in the passage?

- A. One VPA service was priced higher for protecting users’ privacy.
- B. An airline bore high costs for applying VPAs to its online service.
- C. An app failed to offer the right direction when given spoken instructions.
- D. Some teenagers became more socially awkward due to the addiction to VPAs.

29. What is the purpose of the passage?

- A. To inform readers of the double-edged quality of a new technology.
- B. To inspire readers to explore the future of a new technology.
- C. To promote the application of a new technology.
- D. To stress the convenience of a new technology.

30. What might be the best title of the passage?

- A. The worries over VPAs.
- B. Talking to technology.
- C. The world of technology.
- D. Listening to “a real person.”

D

A person could be forgiven for believing 20 years ago that the Internet would soon revolutionise academic publishing, because it became possible for publishers to spread scholarly work at the click of a button — much cheaper than the traditional subscription-based (订阅) model. Recognising the opportunity, many scholars and librarians began to advocate a new, open access model, in which articles are made freely available online to anyone. The result would be a true online public library of science.

However, more than two decades later, the movement has made only slight progress, and the traditional subscription-based model remains entrenched.

Fortunately, things are changing. A big shoe dropped when the University of California (UC) Libraries, one of the biggest library systems, declined to renew its contract with Elsevier, a leading scientific publisher. Elsevier wanted the Libraries to pay two fees: One for its package of licensed journals and the other for the use of Elsevier’s open

access model. UC Libraries wanted the licensed journals fee to cover the open access fee; they also wanted open access to all UC researches published in Elsevier journals. When the two sides couldn't come to terms, the Libraries walked away.

Actually, the open access revolution is more likely to be led by research funding agencies, who can use their purse power to promote open access. A team of funders, Coalition S, insisted that any research they fund should be published in a journal that makes all of its articles freely and immediately available to the public, which is called Plan-S.

Now that some librarians and funders are flexing their muscles, what should academics do? The worst response would be to complain that Plan-S deprives(剥夺) them of academic freedom. Some thoughtful academics might worry that a shift to open access would affect their promotion. After all, subscription journals are more familiar and more prestigious (有威望的) in the current system. However, if enough academics support open access, the system could reach a tipping point beyond which subscriptions no longer signal prestige. Reaching that point would take considerable time and efforts, but it is possible.

When the journal system began in 1665, it was kind of a form of open access. Journals allowed academics to learn openly from one another. It was only in the 1900s that the journal system became thoroughly commoditized(商品化). Now is the time to bring it back to its roots.

31. What does the underlined word probably mean?

- A. Uncertain. B. Rooted. C. Limited. D. Popular.

32. What is the core of failed negotiation between UC Libraries and Elsevier?

- A. The duration of the contract. B. The way of payment.
C. The charge for open access model. D. The choice of licensed journals.

33. What can be inferred from the passage?

- A. Academics welcome open access model with full heart.
B. Open access model will soon achieve a dominant position.
C. Publishers are willing to abandon the subscription model gradually.
D. Establishing a true online public library of science requires joint efforts.

34. What is the author's attitude towards the open access model?

- A. Critical. B. Supportive. C. Disapproving. D. Indifferent.

第二节 (共5小题;每小题2分,共10分)

根据短文内容,从短文后的七个选项中选出能填入空白处的最佳选项,并在答题卡上将该项涂黑。选项中有两项为多余选项。

Why We Listen to Music with Lyrics(歌词) We Don't Understand

From French electronic to K-pop and Spanish jazz, it's common for us to listen to songs we don't necessarily understand. 35. Sometimes, we even sing along to them without knowing the dictionary meaning of lyrics.

But why? It all starts with what's called "sound symbolism(语音表意)," which refers to the study of the relationships between utterances(发声) and their meaning. In music, there's something about the appeal of words as sounds, beyond their meaning in a language. 36. This might explain why we are fond of a song even without knowing its lyrics.

_____37_____. One example of such techniques is scale(音阶). Songs in major scales are brighter or happier, while minor scales usually sound slightly darker or bluer. Our brain is wired to respond to a certain sound, and our breathing and even our movement go with the sound we hear. _____38_____. Besides, elements of sound and music, like pitch, melody or harmony, also have an affective, emotional, and even physical impact on listeners. Through a complex of these elements, music adds so much meaning and dimension to lyrics. That is to say, the combination of all these creates the meaning far beyond the lyrics' dictionary meaning.

_____39_____. Lyrics are powerful tools for helping us recognise, express and reflect our emotions. All in all, there's value in whatever immediate appeal we find in the music we listen to, whether or not we understand the words. Music, after all, is a universal language.

- A. The interrelationship of melody and pitch is important.
- B. This is why fast-paced music is so popular for running.
- C. Of course, this isn't to ignore the importance of lyrics in music.
- D. Things like a musician's image also help convey meaning through songs.
- E. So, when listening to a foreign song, we enjoy the lyrics as sounds and not words.
- F. It seems that not knowing the language of the lyrics doesn't stop us from liking a song.
- G. Some musical techniques and elements can also help convey certain moods and messages.

第三部分：书面表达(共两节，32分)

第一节(共4小题;第40、41题各2分，第42题3分，第43题5分，共12分)

阅读下面短文，根据题目要求用英文回答问题。

How to Stop Overthinking

We all have times when we worry, whether it's about work, health, family, relationships or a host of other reasons. But is there a point when you may think and worry too much?

Overthinking is an unhealthy habit that typically causes more stress by focusing on the negative instead of coming up with logical solutions. For example, we may start worrying about a specific situation at work, which leads to worrying about money or losing jobs.

But why do we tend to overthink? This is often due to cognitive errors, which are basically errors in logical thinking, such as all-or-nothing thinking and overgeneralisation. Although overthinking is hard to break, Natacha Duke, a registered psychotherapist, outlines strategies that can help.

"Healthy distraction can be useful," says Duke. Activities like reading and taking a walk can help keep our stress levels down. They can reduce our baseline level of anxiety and make us less likely to overthink.

Duke adds, "Keeping a daily journal can help us actively manage stress before our feelings expand out of control." As we practise journaling our emotions and thoughts, it becomes easier to identify when we're starting to worry. Stopping worrying early will ultimately help us feel better and stay focused on what matters most to us.

Some people constantly think about questions like "What if I lose my job?" or "What if I get sick?" While having these thoughts is normal, it becomes a problem when we focus only on the worst-case situation. "For every 'what if' worry, change this to an 'if then' statement where you come up with ideas to deal with the worry or the worst-case situation," says Duke. "Focus on having a concrete plan in place."

So, face the problems, then challenge and reframe them. Finally, we will develop effective ways to cope with overthinking.

40. What is overthinking?

41. What causes overthinking?

42. Please decide which part is false in the following statement, then underline it and explain why.

A man can stop overthinking if he changes “what if” questions to “if then” statements, because it helps him focus on the worst-case situation.

43. Besides the suggestions mentioned in the passage, what other advice will you give to a person who is always overthinking?

细节理解题。根据文章第二段第三句“Fifteen minutes later, she came to me, telling me that she was unable to find the Internet icon(图标).”(15分钟之后，她来到我身边，说她找不到电脑图标。)及第三段第二句“This time, my mother said that she was unable to search for the particular recipe.”(这次，母亲说她查找不到具体的食谱。)可知，母亲因为不会使用电脑，所以无法找到在线食谱。故选 A 项。

【25题详解】

细节理解题。根据第五段第一句“To avoid being disturbed again, I decided to find the recipe for her.”(为了避免被再次打扰，我决定帮她找到食谱。)可知，我为了不让母亲一直打扰我，所以亲自给她找到了食谱并打印出来。故选 C 项。

【26题详解】

推理判断题。根据最后一段第二句第三句“When I was young, my mother endured my endless questions,

enlightening me with much patience. Now that I am older, the roles slowly reverse.”（当我小时候，母亲容忍了我的许多问题，带着极大的耐心启蒙我。现在我长大了，角色慢慢颠倒了。）可知，我开始反思自己对母亲的态度，并站在母亲的立场上考虑问题，说明了换位思考的重要性。故选 D 项。

【答案】27. C 28. D 29. A 30. B

【导语】本文是一篇说明文。本文介绍了语音识别技术不断的发展，但是再高级的技术也无法实现“真人发声”的效果，同时指出，语音识别技术可能会产生一些负面影响，比如侵犯个人隐私等，但是，就目前而言，语音识别软件的不断发展值得人们的期待。

【27 题详解】

细节理解题。根据第二段中的“The VPA can also hold a basic “conversation” and has earned fame for its elementary sense of humour. Still, the humour is preprogrammed and can be triggered only when human users speak certain key words.(VPA 还可以进行基本的“对话”，并因其基本的幽默感而声名鹊起。尽管如此，幽默是预先编程的，只有在人类用户说出某些关键词时才能触发。)”可知，尽管 VPA 可以进行基本的对话，甚至会在对话时有幽默感，但是这些幽默都是预先编程的，所以，VPA 能够完成预先编程好的对话。故选 C 项。

【28 题详解】

推理判断题。根据第三段中的“Some experts worry about people’s attachment to these machines and fear that the art of successful human-to-human conversation will be undeveloped in younger generations.(一些专家担心人们对这些机器的依恋，并担心成功的人与人对话的艺术在年轻一代中将得不到发展。)”可知，人们一旦对机器产生了依恋，那人与人对话的艺术在青年一代就可能得不到发展，分析选项可知，D 项描述的现象与文中的担心有关。故选 D 项。

【29 题详解】

推理判断题。根据第二段中的“One significant recent achievement in the field of talking computers is virtual personal assistants (VPAs) on mobile phones. If you tell a mobile phone VPA that you want to schedule a lunch with a friend, it can set the appointment in your phone in seconds.(在会说话的计算机领域，最近取得的一项重大成就是手机上的虚拟个人助理 (VPA)。如果您告诉手机 VPA 您想与朋友安排午餐，它可以在几秒钟内在您的手机中设置约会。)”可知，语音识别系统的开发，给人们带来了一些便利，再根据第三段中的“While the potential for “real” communication between a human and a machine may seem exciting, this possibility concerns some people.(虽然人与机器之间“真正”通信的潜力似乎令人兴奋，但这种可能性会使一些人担忧。)”以及下文中讲述的一些由语音识别技术产生的担忧问题可知，尽管人机交流的潜力令人兴奋，但是这也会使得人们产生一些担忧，由此可以判断，该文目的是告知读者技术的双面特点。故选 A 项。

【30 题详解】

主旨大意题。根据首段中的“The technology for speech-recognition systems has advanced greatly since its appearance in the 1950s. Many voice systems can understand the language when spoken at a normal conversational rate.(自 1950 年代出现以来，语音识别系统技术取得了长足的进步。许多语音系统在以正常的会话速率说话时可以理解该语言。)”以及下文中讲述的语音识别系统的一些弊端，以及语音识别技术引发的一些问

题, 和最后一段中对语音识别系统开发的期待, 可以判断全文均是讲解的语音识别系统的相关信息, 所以“与技术对话”符合文章内容。故选 B 项。

【答案】31. D 32. C 33. D 34. B

【31 题详解】

词句猜测题。根据上句“However, more than two decades later, the movement has made only slight progress(然而, 20 多年过去了, 这一运动只取得了微小的进展)”可知, 传统的订阅模式依然很受欢迎。由此推知, 划线词 entrenched 与 popular(受欢迎的)意思相近。故选 D。

【32 题详解】

推理判断题。根据文章第三段“Elsevier wanted the Libraries to pay two fees: One for its package of licensed journals and the other for the use of Elsevier’s open access model. UC Libraries wanted the licensed journals fee to cover the open access fee; they also wanted open access to all UC researches published in Elsevier journals. When the two sides couldn’t come to terms, the Libraries walked away.(爱思唯尔希望图书馆支付两笔费用: 一笔是它的授权期刊包, 另一笔是使用爱思唯尔的开放获取模式。加州大学图书馆希望授权期刊费能覆盖开放存取费; 他们还希望开放加州大学在爱思唯尔期刊上发表的所有研究。当双方无法达成协议时, 图书馆离开了)”可推知, 开放获取模式收费是 UC 图书馆和爱思唯尔谈判失败的核心问题。故选 C。

【33 题详解】

推理判断题。根据文章倒数第二段“However, if enough academics support open access, the system could reach a tipping point beyond which subscriptions no longer signal prestige. Reaching that point would take considerable time and efforts, but it is possible.(然而, 如果有足够多的学者支持开放获取, 该系统可能会达到一个临界点, 超过这个临界点, 订阅就不再意味着声望。要达到这一点需要相当长的时间和努力, 但这是可能的)”可推知, 建立一个真正的在线科学公共图书馆需要共同努力。故选 D。

【34 题详解】

推理判断题。根据文章最后一段“It was only in the 1900s that the journal system became thoroughly commoditized (商品化). Now is the time to bring it back to its roots.(直到 20 世纪, 期刊系统才彻底商品化。现在是时候让它回归本源了)”可推知, 作者对开放存取模式的态度是支持的。故选 B。

第二节 (共 5 小题;每小题 2 分, 共 10 分)

【答案】35. F 36. E 37. G 38. B 39. C

【解析】

【导语】这是一篇说明文。文章解释了生活中人们虽然不懂歌曲中歌词, 但人们一样喜欢这些歌曲的原因。

【35 题详解】

根据前文“From French electronic to K-pop and Spanish jazz, it’s common for us to listen to songs we don’t necessarily understand.”(从法国电子音乐到韩国流行音乐和西班牙爵士乐, 我们经常听我们不一定能听懂

的歌曲。)描述了生活中普遍存在我们经常听我们不一定能听懂的歌曲。下文“Sometimes, we even sing along to them without knowing the dictionary meaning of lyrics.”(有时候,我们甚至不知道歌词的字典意思就跟着唱。)表明人们会跟唱自己喜欢的歌曲,即使不懂歌曲的语言。因而空处可以描述不明白歌曲的语言并不阻碍我们喜欢听歌曲。选项 F.“似乎不知道歌词的语言并不能阻止我们喜欢一首歌。”切题,故选 F。

【36 题详解】

根据上文“In music, there’s something about the appeal of words as sounds, beyond their meaning in a language.”(在音乐中,单词作为声音的吸引力超越了它们在语言中的意义。)说明音乐中人们享受的是歌唱者的声音的吸引力。下文“This might explain why we are fond of a song even without knowing its lyrics.”

(这也许可以解释为什么我们即使不知道歌词也会喜欢一首歌。)说明人们会因为享受歌唱者的声音而喜欢一首歌。所以空处应承上启下,讲述人们在听外文歌曲的时候,是在享受声音而不是听歌词。选项 E.“所以,当我们听一首外国歌曲时,我们喜欢的是歌词的声音,而不是歌词。”切题,故选 E。

【37 题详解】

根据下文“One example of such techniques is scale(音阶). Songs in major scales are brighter or happier, while minor scales usually sound slightly darker or bluer.”(这种技巧的一个例子是音阶。大音阶的歌曲更愉快或者更快乐,而小音阶的歌曲通常听起来更忧郁或者更悲伤。)说明音乐中是会用到一些技巧来实现情绪的表达。因而空处应表述某些技巧会用在音乐中来表达情绪和信息。选项 G.“一些音乐技巧和元素也可以帮助传达特定的情绪和信息。”切题,故选 G。

【38 题详解】

结合前文“Our brain is wired to respond to a certain sound, and our breathing and even our movement go with the sound we hear.”(我们的大脑会对特定的声音做出反应,我们的呼吸,甚至我们的动作都会随着我们听到的声音而变化。)说明人们会随着听到的音乐在动作上做出相应的变化。下文“Besides, elements of sound and music, like pitch, melody or harmony, also have an affective, emotional, and even physical impact on listeners.”(此外,声音和音乐元素,如音高,旋律或和声,也会对听众的情感,情绪,甚至身体都会影响。)表明声音和音乐元素会影响听众的情感,情绪,甚至身体的动作。因而空处应承接前文,讲述音乐对人们的行为影响的一个具体表现。选项 B.“这就是为什么快节奏的音乐在跑步中如此流行。”表明人们会结合快节奏的音乐调整自己的动作,切题,故选 B。

【39 题详解】

根据下文“Lyrics are powerful tools for helping us recognise, express and reflect our emotions.”(歌词是帮助我们识别、表达和反映情感的有力工具。)表明歌词同样有着作用。所以空处应该讲述歌词的作用也不能忽视。选项 C.“当然,这并不是忽视歌词在音乐中的重要性。”切题,故选 C。

第三部分:书面表达(共两节,32分)

第一节(共4小题;第40、41题各2分,第42题3分,第43题5分,共12分)

【答案】40. Overthinking is an unhealthy habit that typically causes more stress by focusing on the negative instead of coming up with logical solutions.

41. This is often due to cognitive errors, which are basically errors in logical thinking, such as all-or-nothing thinking and overgeneralisation.

42. A man can stop overthinking if he changes “what if” questions to “if then” statements, because it helps him focus on the worst-case situation. While having these thoughts is normal, it becomes a problem when we focus only on the worst-case situation. Therefore, A man can stop overthinking if he changes “what if” questions to “if then” statements, because it can stop him focus on the worst-case situation.

43. Seeking professional help is also an effective way to cope with overthinking. They can give us better advice which will help us feel better and stay focused on what matters most to us.

【解析】

细节理解题。根据文章第三段 “This is often due to cognitive errors, which are basically errors in logical thinking, such as all-or-nothing thinking and overgeneralisation(这通常是由于认知错误，这基本上是逻辑思维中的错误，比如孤注一掷的思维和过度概括)” 可知，过度思考是由于认知错误，这基本上是逻辑思维中的错误所造成的。故答案为 This is often due to cognitive errors, which are basically errors in logical thinking, such as all-or-nothing thinking and overgeneralisation.

【42 题详解】

推理判断题。根据文章倒数第二段 “Some people constantly think about questions like “What if I lose my job?” or “What if I get sick?” While having these thoughts is normal, it becomes a problem when we focus only on the worst-case situation(有些人经常会想这样的问题：“如果我失业了怎么办？”或者“如果我生病了怎么办？”虽然有这些想法很正常，但当我们只关注最坏的情况时，它就会成为一个问题)” 以及 “For every ‘what if’ worry, change this to an ‘if then’ statement where you come up with ideas to deal with the worry or the worst-case situation,” says Duke. “Focus on having a concrete plan in place.”(对于每一个“如果”的担忧，把它变成一个“如果”的陈述，在那里你想出了解决担忧或最坏情况的方法，杜克说。专注于制定一个具体的计划)” 故答案为 A man can stop overthinking if he changes “what if” questions to “if then” statements, because it helps him focus on the worst-case situation. While having these thoughts is normal, it becomes a problem when we focus only on the worst-case situation. Therefore, A man can stop overthinking if he changes “what if” questions to “if then” statements, because it can stop him focus on the worst-case situation.

【43 题详解】
