Nothing Is Impossible

When I tried out for the football team during the summer before the 9th grade, I never imagined how important this sport would become in my life. Football is a challengeable sport, at times almost painful, and practices really __ 13 __ a team's physical and mental limits. Without trust in my own ability and a strong sense of commitment(投入), I would never have managed to continue after years of hard work as a player, and with countless injuries (损伤).

In the first year, I played on the defensive line. This was an amazing position that gave me a great sense of achievement. But in the last game of the season, I was __ 14 __ injured. I was prohibited(禁止) from any physical activities for six months. After going through a series of physical __ 15 __, I returned to the field as a team captain. I practiced harder than ever to make up for my __ 16 __ time.

In September, during my junior year, my name was mentioned in the local newspaper as the key defensive linemen on the team. After playing a fantastic season, I was given the __ 17 __ of Most Valuable Player.

Unluckily, my skills in football do not magically extend to other sports. During the winter break, I went on a snowboarding trip and seriously injured my right __ 18 __. I had to have four operations. Since I could not use my right arm for two months, I had to learn how to write and eat using my left hand.

But life must go on. I knew that my own present efforts would decide my future, so I completed the strict training program to build strength and __ 19 __ flexibility(灵活性) in my shoulder. After an

eight-month recovery, I was back out on the field playing football, the sport I ___ 20__.

In this sense, the world of football has taught me an important life lesson: Belief and commitment make what seems impossible possible. This lesson from football is one that I know translates through every part of life.

Truly a Wonder!

Anna was a 9-year-old girl from a small village. She finished attending primary school till the 4th grade at her village. For the 5th grade, she would have to get an admission(入学) in a school at a city nearby. She was very happy knowing that she was accepted in a famous school in the city.

When she reached her school on the first day, all students started going to their classes. Anna also made it to her classroom. When seeing her simple clothing and knowing she was from a small village, other students started making fun of her. The teacher soon arrived. She introduced Anna to the class and told them that she would study with them from that day on.

During the class the teacher told the students to be ready for the surprise test now! She told everyone to write down the Seven Wonders of the world. Everyone started writing the answer quickly. But Anna started to write the answer slowly.

When everyone except Anna had presented their answer paper, the teacher asked Anna, "What happened, dear? Don't worry. Just write what you know as other students learned about it just a few days ago."

Anna replied, "There are many things. Which seven can I pick to write?" And then she handed her answer paper to the teacher. The teacher started reading everyone's answers and most of the students had answered them correctly such as The Great Wall of China, Stonehenge, Great Pyramid of Giza, Leaning Tower of Pisa, Taj Mahal, etc.

The teacher was happy as students had remembered what she had taught them. At last the teacher picked up Anna's answer paper and started reading. "The Seven Wonders are—To be able to See, To be able to Hear, To be able to Feel, To Laugh, To Think, To be Kind, To Love!"

The teacher stood shocked and the whole class was speechless. Today, a girl from a small village reminded us about the gifts we have, which are truly a wonder. So value what we have and use what we have.

24. How did Anna feel when she was accepted in a new school?

- A. Nervous. B. Happy. C. Surprised. D. Excited.

25. What did the teacher ask the students to do during the class?

- A. To draw a picture. B. To take a good rest.

C. To have a test. D. To give a speech.

26. The teacher felt very shocked because _____.

- A. Anna didn't know the answers
- B. all the students' answers were correct
- C. students had remembered what they learned
- D. Anna's answers reminded them what they have is truly a wonder

C

On April 18th—the International Day for Monuments and Sites, China Daily's digital employee Yuanxi and Dunhuang Mogao Grottoes' official virtual (虚拟的) cartoon figure Jiayao together introduced an interactive digital platform(数字化互动平台) that hosts a virtual copy of the Mogao Grottoes' Library Cave to the world.

The platform was developed jointly by the Dunhuang Academy and the Chinese tech firm Tencent. It uses gaming technologies to show the historical scenes of the Library Cave in the digital world.

The Library Cave in Mogao Grottoes was discovered in 1900, with more than 60,000 cultural relics dating from the 4th century to the 11th century unearthed. It was one of the most important archaeological discoveries in the 20th century.

On the platform, visitors can role-play and “time travel” to ancient dynasties and talk with eight historical figures. The public can enter the platform through the Digital Dunhuang website and its WeChat mini program.

In the digital age, the model of “culture + technology” has been adopted to promote(促进) the development of Chinese culture. The digitalization rate of China's precious cultural relics has been more than 70 percent, according to the 2022 China Digital Collection Industry Research Report released by iResearch.

Institutions(机构) such as the Palace Museum have also launched online digital services of their own. Artificial intelligence (AI) technology allows the public to view the interior of the buildings through the Palace Museum's WeChat mini program.

The Ministry of Culture and Tourism has also encouraged the development and transformation(转型) of cultural intellectual property by digital means. China Central Television has created a series of digital collections with different Dunhuang themes, such as the Dunhuang divine deer Youyou. It was created based on the image of the nine-colored deer from Dunhuang murals. The public can see the divine deer on CCTV's own digital platform.

Digital collections cater to(迎合) the consumption habits of young people. They not only protect the intellectual property of the collections but also bring the public closer to China's “excellent traditional culture”, noted Dunhuang Art Institute.

Su Bomin, director of the Dunhuang Academy, told Xinhua that more efforts will be made to explore new forms for showing cultural relics and offer the public more immersive cultural experiences

to develop Dunhuang culture.

27. On the interactive digital platform for the Mogao Grottoes' Library Cave, visitors can _____.
- A. play role-playing games set in ancient times
 - B. play video games named historical characters
 - C. design digital caves showing historical culture
 - D. talk to the designer of the digital Library Cave
28. What is the purpose of developing digital platforms for cultural institutions?
- A. To show the latest gaming technologies.
 - B. To help cultural institutions make money.
 - C. To promote the development of Chinese culture.
 - D. To encourage people to explore new forms of digital collections.
29. Which of the following would be the best title for the passage?
- A. Presenting Digital Collections
 - B. Experiencing History Online
 - C. Creating Mini Programs
 - D. Introducing Gaming Technologies

Does Music Make You Smarter?

What interests many parents is that musical training improves the development of the brain—that “music makes us smarter”. According to a study published by the UK’s largest music education body, 7 out of every 10 children say they presently play a musical instrument. Whether this figure (数字) shows that most parents do believe the statement, or whether the potential benefits of music are hard to ignore (忽视). Ongoing research looks for suggestive evidence proving that musical training may actually strengthen the so-called “smart skills”.

The relationship between music and memory has long been the subject of research. In the 2003 study by The Chinese University of Hong Kong were 90 boys between the ages of 6 and 15, half of whom had 1 to 5 years of musical training and half of whom had none at all. Each of them had a memory test, with the musically trained students recalling more words, and being able to memorize more words after 30 minutes. One year later, a follow-up study showed that those students who had continued training, as well as novices who had recently begun musical training, both showed improvement in **retention**. However, students who had stopped music practice fewer than three months after the first study showed no further improvement. These results suggest that music training might improve memory function.

There is also increasing evidence that musical training may result in structural changes to the brain. Noticeable differences have been found between the brains of musicians and non-musicians. The size of those areas of the musician’s brain connected with hearing and visuospatial abilities is larger. A 2014 study found that the part of the cortex (大脑皮层) was thicker in children who had taken musical training.

However, like many scientific studies, research into the benefits of music remains ongoing, with

many different opinions. Some deny (否认) that music makes people smarter. Others think that people who are naturally gifted in the cognitive (认知的) functions are simply more likely to play musical instruments. It would therefore be premature (草率的) to state without any doubt that music makes people smarter. Whatever the truth behind the statement that “music makes us smarter”, it should eventually come second only to the fact that music is one of life’s greatest pleasures.

30. The studies by The Chinese University of Hong Kong show that _____.

- A. most parents believe the statement
- B. people who take musical training might be happier
- C. musical training may result in changes to the brain
- D. musical training might improve students’ ability to remember things

31. The word “**retention**” in Paragraph 2 probably means “_____.”

- A. memory
- B. practice
- C. train
- D. subject

32. What can we learn from the passage?

- A. People have different opinions on whether music can make them smarter.
- B. A child whose cortex is thicker prefers to take musical training.
- C. 70 percent of students like playing musical instrument.
- D. Students who had taken the test had continued training.

33. What is the writer’s main purpose in writing this passage?

- A. To stress that musical training may benefit the brain.
- B. To show that finding pleasure in music is important.
- C. To suggest that people learn a musical instrument.
- D. To remind that musicians are usually smart.

第二部分

本部分共 5 题,共 20 分。根据题目要求,完成相应任务。

四、阅读表达 (34 至 36 每题 2 分,37 题 4 分,共 10 分)

阅读短文,根据短文内容回答问题。

How to Be Successful in a New Environment?

Perhaps, you are a smart person with good knowledge and creative ideas, but when you move to a new environment or have to work with some new people, it is not always easy for them to recognise you or respect you immediately. How can you get along with others? How can you get other people to pay attention to you and respect you?

Be curious and be willing to learn new things, knowledge and skills. Moving to a new working environment, you may need to deal with things that don’t belong to your own field. In such a case, people who are more willing to learn new things can become more flexible (灵活的) and be able to meet new requirements in their job.

Have a good sense of judgement on important aspects. Learning or working in a new environment, you need to have a good sense of judgement when joining a discussion or making a

decision. You should consider what is virtually right, and look for long-term goals, and not be distracted (使分心) by small choices for the short term.

Be confident and make eye contact when talking to people. When you go out and meet people, it is important to look confident. For example, if you are going to an interview, but you don't feel confident, what can you do? Before you walk in, think to yourself, "I own the room." Then, walk in holding your head high and smile. Remember to look other people in the eye—it's the key to creating a connection with people. Soon, you will feel as confident as you look.

Set clear goals and learn. When working together with others, it is important that you have a clear vision and a working plan to achieve it. Let people know what you stand for. You need to find out which ideas can really unite people and then express those ideas clearly. Also, treat your team members respectfully as equals.

Be helpful to others. When working, don't focus on what is your work and what isn't. After doing your own work, always be ready to help others.

34. What kind of people can become more flexible in their job?

35. When do you need to have a good sense of judgement according to the passage?

36. What is important for you when you go out and meet people according to the passage?

37. Would you like to follow the suggestions above? Why or why not?

五、文段表达(10分)

38. 从下面两个题目中任选一题,根据所给提示,完成一篇不少于 50 词的文段写作。文中已给出内容不计入总词数。所给提示词语仅供选用。请不要写出你的校名和姓名。

五、文段表达

38. 参考范文:

题目①

I'm glad to hear from you. I will share my most unforgettable experience with you.

Last year, I took part in an English speech competition. I was very nervous before the final competition. But my best friend Lisa encouraged me to believe in myself. She also gave me some useful suggestions on giving a speech. After two week's preparation, I made great progress. Finally, I won the first prize in the competition.

I was thankful to Lisa. With her help, I learned how to face challenges confidently. It will influence my whole life.

题目②

Effective learning methods can help you achieve a lot. In my opinion, taking notes is a useful method of learning. When I take notes, I often write some key words with colorful pens. And I review them at the end of a day.

By doing so, I can remember things quickly and clearly. Now, I have made great progress in studying. So I think taking notes is a good method. It helps me to become a good learner.
