What better ways to start to the winter months than to nestle up with a podcast(播客) or two? Perhaps you could feel inspired by some of the amazing women hosting shows. There will be plenty of indoor hours in the day to try them out!

Hormonal

Hormonal is a brand new, weekly podcast, hosted by author Rhea Ramjohn and produced by female health app, Clue. The first season aims to solve the mystery of hormones, shedding light on the different ways in which they impact our lives.

Encyclopedia Womannica

Encyclopedia Womannica is a relatively new offering that certainly packs a punch. Host

HD

Liz Kaplan was inspired to do this while musing on(沉思) her school history lessons, which she remembered as not really containing women. It aims to resolve that issue by teaching listeners about important women who have made an impact on the world — but have not necessarily been recognised for it.

The Broad Experience

This podcast runs in 20-minute episodes(一集) which tackle some of the toughest issues facing working women today. Just tune in to Ashley Milne-Tyte, reporter and teacher. Topics include being a professional woman without kids, the difficulty of delegating colleagues, and even sexual harassment(骚扰).

Afford Anything

Afford Anything is a podcast that offers up an interesting concept: you can afford anything, but not everything. It's run by Paula Pant as an extension to her book, *Escape*, and the career she's built on advising other people on how to make the most of their time, energy and money.

21. What do we know about Hormonal?

- A. It's a week-long podcast.

22. What is special about Encyclopedia Womannica?

- A. It's inspired by Liz's history teacher.
- B. Its content does not really contain women.

23. Whom might those with financial problems turn to?

- A. Rhea Ramjohn.
- B. Liz Kaplan.

B

Twenty-five years ago on July 1, 1997, I woke up very late in my apartment in Singapore. I jumped out of bed in a little bit of panic. I woke up my 8-year-old daughter Avy, who was not exactly in a hurry to get out of bed. "We're late for school," I half-yelled at her. I finally got her into the shower, dressed her hurriedly and made it to the nearby bus stop in time. Thankfully, the school was only two stops away. We got in, rubbing our eyes as the sunlight streamed into the bus.

Her mom had flown to Hong Kong several days earlier on assignment for a newspaper to cover the handover of the city's return to China.

I had taken off from work for a week to help look after our daughter. I would pick up my daughter from school around midday. At the end of the day, I would watch the news on TV, which would lead the entire week with the historic events happening in Hong Kong. I would wonder where my wife was in the crowd that was gathered to witness the handover.

The year, 1997, was tense because the Asian financial crisis began. The Thai baht(泰铢) was hit, followed by the South Korean won(韩元) and, like a contagious virus which spreads rapidly, the financial system seized up. For that week though, that was the least of my worries. I just made sure we did not have a repeat of July 1, when we were nearly late for school. My wife was very busy during the handover, chasing down stories in Hong Kong as the British flag was lowered for the last time.

I later spent a few years working in Hong Kong, but my enduring memory of the days

surrounding its return to China was the time I spent as a babysitter, although it is kind of hard to call an 8-year-old a baby. The whole thing was a lifetime ago. But it is a good memory.

24. What was the author's day like on July 1, 1997?
- A. He and his daughter woke up in panic.
 - B. He barely got his daughter on time.
 - C. It was his first babysitting day.
 - D. His daughter went to school energetically.
25. Why did the author ask for a leave?
- A. He wanted to witness the historic events.
 - B. He needed to take care of his daughter.
 - C. He drove his daughter to school and pick up her back around midday.
 - D. He accompanied his daughter to find her mother on TV in the evening.
26. Which of the following caused the nervousness in 1997?
- A. The events happening in Hong Kong.
 - B. The crowd gathered to see the handover.
 - C. The spread of the Asian financial crisis.
 - D. The 8-year-old daughter I was babysitting.
27. What is the passage mainly about?
- A. The historic events in 1997.
 - B. Life of a journalist's husband.
 - C. A working dad's way of babysitting children.
 - D. Bitter sweet memory with daughter alone.

C

While it may sound like something that has crawled(爬) out of your nightmares, cyborg cockroaches(蟑螂) have arrived as friends rather than enemies. Researchers from Japan's RIKEN Cluster for Pioneering Research have designed a new remote-controlled insect, equipped with a battery "backpack" that is powered by solar panels.

The cyborg cockroach, which is part insect and part machine, is intended to enter dangerous areas, monitor the environment or undertake search and rescue missions without needing to be recharged.

Famously able to survive a nuclear war, cockroaches have been the inspiration for a number of technologies in recent years. The cockroaches are still alive, but wires attached to their two "cerci"—sensory organs on the end of their stomachs—send electrical impulses that cause the insect to move right or left. A battery is necessary for the sending and receiving of these electrical signals, which needs to be charged up.

While it's possible to build docking stations for recharging the battery, the need to return and recharge could disrupt time-sensitive missions. The RIKEN team wanted to create a more practical version when it ran out of power. Therefore, they designed an on-board solar cell that could continuously ensure that the cockroach stays charged while it works.

However, cockroaches have a limited surface area available for all the components necessary to move its legs and keep it powered. The solution, published in *npj Flexible Electronics*, was to design a special "backpack" that could neatly carry both the wireless leg-control module and rechargeable lithium polymer(锂聚合物) battery.

This was attached to the top of the insect on its chest, and was 3D printed to fit perfectly to the curved surface of the Madagascar cockroach. It allowed for this electronic device to be stably mounted on the insect for over a month, while leaving space elsewhere on the body to implant the solar panel.

28. What do we know about cyborg cockroaches?
 A. They are new-invented and helpful devices. B. They are a new kind of insect.
 C. They are in fact very unfriendly. D. They are powered by a backpack.
29. How does the cockroaches follow instructions to move?
 A. They can be kept alive with inspiration. B. They are equipped with sensors.
 C. They do missions near docking stations. D. They carry an on-board solar cell.
30. What function is expected of the RIKEN team's solution?
 A. To apply 3D printing to the design perfectly.
 B. To enlarge the surface available for equipment.
 C. To fasten the cell and module neatly on cockroaches.
 D. To ensure the cockroaches return and recharge efficiently.
31. Which is the most suitable title for the text?
 A. Cyborg Cockroaches—No More Nightmares
 B. Battery “Backpack”—3D Printing in Use
 C. Battery “Backpack”—Design for Hard Missions
 D. Cyborg Cockroaches—Rescuers on the Way

D

Recent studies suggest global food production is responsible for one-third of all planet-heating emissions, with the use of animals for meat accounting for twice the pollution of producing plant-based foods. Forests that absorb carbon dioxide are cut down for raising animals while fertilisers used for growing their feed are rich in nitrogen(氮), which can contribute to air and water pollution, climate change and ozone depletion(臭氧损耗). Livestock also produces large quantities of methane, a powerful greenhouse gas.

A Dutch city will become the first in the world to ban meat advertisements from public spaces in an effort to reduce consumption and greenhouse gas emissions.

Haarlem, which lies to the west of Amsterdam and has a population of about 160,000, will pass the prohibition from 2024 after meat was added to a list of products thought to contribute to the climate crisis. Ads will not be allowed on Haarlem's buses, shelters and screens in public spaces, prompting the complaint from the meat sector that local authority is “going too far in telling people what's best for them”.

Ziggy Klazes, who drafted the proposal banning meat advertising, said she had not known the city would be the world's first to enforce such a policy when she proposed it. She told a radio channel: “We do not prohibit what people are baking and roasting in their own kitchen; if people wanted to continue eating meat, fine ... We can't tell people there's a climate crisis and encourage them to buy products that are part of the cause.”

The ban also covers holiday flights, fossil fuels and cars that run on fossil fuels. The ban is delayed until 2024 due to existing contracts with companies that sell the products. Research suggests that to meet the EU target of net zero emissions by 2050, meat consumption must be reduced to 24kg per person per year, compared with the current average of 82kg.

32. Why does Haarlem intend to ban meat advertisements?
 A. To take the lead in cutting emission. B. To switch food to plant-based food.
 C. To stop advocating eating meat publicly. D. To contribute to the climate crisis.
33. What does the phrase underlined in paragraph 3 probably mean?
 A. The government have taken too much control of people.
 B. The local authority is wrong about the best meat.
 C. Meat sector complains for harming their interests.
 D. Climate crisis has gone too far to be left untreated.

34. What is Ziggy Klazes's attitude to eating meat?
A. Uncaring. B. Opposing. C. Guilty. D. Understanding.
35. What can be inferred about the ban?
A. It won't benefit the EU market. B. It has a long way to go.
C. It is a short-sighted decision. D. It can hardly meet the target.

第二节(共5小题;每小题2分,满分10分)

根据短文内容,从短文后的选项中选出能填入空白处的最佳选项。选项中有两项为多余选项。

In recent years, there has been a great deal of discussion about empathy(共情). It has been argued that a lack of empathy has led to several social problems. 36 It is a complex construct. According to psychologist Mark Davis, there are three important types of empathy. Let's explore each type and the possible impact of each.

Perspective-Taking

This is a more cognitive(认知的) form of empathy, and it involves being able to see things from others' perspectives. 37 Our research shows that perspective-taking is very important in social interactions and for leaders because they need to understand the people they lead and manage to motivate them effectively.

Empathic Concern

It is what we most commonly think of as being empathic. This is being able to "read" other people's emotions and feelings and to feel appropriate concern for them. Counselors and therapists need it to deeply understand clients' feelings but not actually experience the other's emotions. 38

Personal Distress

This is indirectly experiencing others' emotions. If they are happy, we feel happy; if they're sad, we cry with them. 39

40 In reality, we all have some level of each of the types of empathy. The key is to understand how we are empathic with others and realize the strengths and limitations of each type of empathy.

- A. It is partly emotional and partly cognitive.
B. We need experience personal distress, but too much of it may not be a good thing.
C. Yet empathy isn't as simple as "more empathy is better".
D. This helps us understand where other people are coming from—their attitudes, viewpoints and emotions, to some extent.
E. Empathy is not just the ability to understand someone's feelings.
F. These types of empathy represent different aspects of our personalities.
G. This is the reason to teach the next generation what it means to have empathy.

Tech giant Baidu 61 (announce) on Monday that it had obtained permits to operate fully autonomous taxis without any human 62 (assist) on board in two of China's megacities(特大城市), marking 63 first for the country.

Baidu said it received the regulatory approvals for its autonomous ride-hailing service Apollo Go to operate on open roads during the daytime in Chongqing and Wuhan. The cities have populations of some 30 million and 11 million people, 64 (respective).

The move represents a notable step forward for Baidu and a potential shift in China's comfort with the new technology. In other cities 65 the company's robotaxis operate, Beijing, Shanghai and Shenzhen 66 (include), Baidu is required to have a human safety operator present in the vehicle.

The permits will allow Baidu 67 (provide) fully driverless robotaxi services in certain areas in Wuhan and in Chongqing. Service will be limited at first, though, with just five robotaxis 68 (operate) then in each city.

In the United States, robotaxi offerings remain limited 69 numbers and ride-hailing giants like Uber and Lyft have abandoned in-house self-driving taxi efforts.

In June, General Motors-backed Cruise gained permits in California to charge a fare for driverless rides in San Francisco. In July, 70, Reuters reported that the National Highway Traffic Safety Administration opened an investigation into a crash of a Cruise self-driving vehicle that resulted in minor injuries.

Text 10

M:Electric vehicles (EVs) are a strong weapon in the world's efforts against global warming. But the effects of EVs depend on what country you are in. A study shows that sales of electric cars are rising the fastest in Europe. ⑰ Data from the Radiant Energy Group suggests that EVs in Poland and Kosovo actually create more carbon emissions because their electric systems depend so much on coal. In other European countries, however, EVs result in reduced emissions. The carbon gas reduction depends on what energy supplies electricity systems and the time of day vehicles are charged. ⑱ The countries which showed the lowest carbon gas savings from EVs were Cyprus at 4 percent, Serbia 15 percent, Estonia 35 percent and the Netherlands 37 percent. An EV driver in Germany reduces greenhouse gas emission by 55 percent over a gasoline car. Germany uses a mix of renewable energy and coal to produce electricity. ⑲ Germany and Spain create a lot of electricity from the sun and wind. But the sun and wind do not add to a country's electricity system equally throughout the day. For this reason, the amount of carbon emissions saved by driving an EV depends on the time of day it is being charged. ⑳ Charging in the afternoon, when there is more sun and wind, saves 16 to 18 percent more carbon than at night when electricity systems are more likely to be using gas or coal.

26. C 细节理解题。根据倒数第二段“The year, 1997, was tense because the Asian financial crisis began. The Thai baht was hit, followed by the South Korean won and, like a contagious virus which spreads rapidly, the financial system seized up.”可知选 C。
27. D 主旨大意题。根据倒数第二段“For that week though, that was the least of my worries. I just made sure we did not have a repeat of July 1, when we were nearly late for school.”及全文信息可知选 D。
28. A 细节理解题。根据短文首段及第二段信息可知,A 对 D 错,文中带引号的“backpack”指的是太阳能电

池装置,不是真的背包会发电。B说是 new kind of insect 不对。

29. B 细节理解题。根据第三段“... but wires attached to their two “cerci”— sensory organs on the end of their stomachs— send electrical impulses that cause the insect to move right or left.” 使尚活着的蟑螂听从人的指令的原因是 sensory organs。A、D 答非所问, C 错误。
30. C 细节理解题。根据第五段 “The solution, published in *npj Flexible Electronics*, was to design a special “backpack” that could neatly carry both the wireless leg-control module and rechargeable lithium polymer battery.” 故选 C。A 强调的是完美结合 3D 打印技术,但是文意是用该技术制作完美契合蟑螂身体的部件。B 的限制是蟑螂身体实际导致,没法扩大。D 项就是研究人员想要避免的。
31. D 主旨大意题。原文提到 nightmare 只是想引出话题,并没有强调蟑螂可怕现在不可怕。BC 都偏题了,文章重点只是讲蟑螂机器人,并没有把电池背包当成一个专项技术作为主体来讲,更没有专门讲到该技术与 3D 打印结合的问题。
32. C 推理判断题。A 项荷兰只是颁布禁令成为了第一个,但并不是为了当第一个做这个事,而且第四段 Ziggy 讲的话也可以佐证。B 项文中并没讲让大家都吃素。D 项说反了。
33. A 词义猜测题。根据上文信息,出台肉制品广告禁令影响了肉类行业的利益,所以他会抱怨政府行政过度。
34. D 推理判断题。根据其所说内容可推知,她只是禁止肉制品广告,不是禁止人们吃肉,对人们吃肉是一种理解的态度。
35. B 推理判断题。根据最后一段为了达成欧盟减碳标准,道阻且长。
36. C 根据下文 “It is a complex construct.” 可知,共情是一个复杂的系统。C 项 “共情不是简单到越多越好。” 后文 It 指 empathy, simple 与 complex 对应。
37. D 根据上文 “... see things from others’ perspectives.” 可知, Perspective-Taking 是指从别人的角度考虑问题, D 项 “在一定程度上理解别人的态度、观点和情感” 与上文语意契合。
38. A 根据上文 “Counselors and therapists need it to deeply understand clients’ feelings but not actually experience the other’s emotions.” 可知, A 项 “它是部分情感部分认知。” 契合文意。
39. B 根据本段标题 “Personal Distress” 可知,本段主题为 “个人悲伤”, B 项 “我们需要体验别人的悲伤,但是体验过多不是好事。” 与本段主旨吻合。
40. F 根据上下文和本句所处的段落可知,本段为全文末段,是对全文进行总结, F 项 “这些类型的共情代表着我们性格的不同方面。” 契合文意。

62. assistants/assistance 考查词形变化。assistant 助手。在否定句和疑问句中, any 多与不可数或复数名词连用。
63. a 考查冠词。first 可做名词, 此句句意强调的是拿到了许可证的公司, 其实没有强调第一, 而且, 作第一讲, first 只能做形容词, 本句会差成分, 填 it 也会差成分。the first 整体做名词句意也不对。

第二节 书面表达(满分 25 分)

One possible version;

Recently, a survey has been conducted to find out the reading interest of high school students. The result is as follows.

More than half of the students like to read their textbooks, for they want to remember as many contents as possible so as to get good scores in the exam. 26% of the students say that English test papers are their favorite. They spent much time in doing countless English exercises on class and after class. While only 14% of the students are most interested in reading English newspaper and 7% of them enjoy reading popular English novels.

The result indicates that the situation of students' learning English is far from satisfactory. Reading English newspapers and novels can broaden their horizons. Only by reading a variety of authentic English materials can we improve English rapidly.
