#### 第一节 (12分)

40. Math is the gatekeeper to science and technology that drive much of our society.  
41. Although math is considered very important, it hardly leads learners to wonder.  
42. • *The author believes math is accessible for students but that new math ideas have been nearly exhausted.*

According to the passage, the author believes math is accessible for students and that fresh ideas are constantly being discovered.

43. 略

第二节 (20分)

参考范文:

*Dear Jim,*

On behalf of Senior 3 students, I'm writing to invite you to take part in a tree-planting activity in the suburb next Saturday.

The activity aims to celebrate our graduation. It might be one of the few occasions when all of us can get together to enjoy senior high school life. We will plant trees and in the meantime plant seeds of hope for the future! We believe the young trees will grow up, healthy and strong, just like us.

Since you have been with us for 3 years and witnessed our growth, we do hope you can come. So would you like to join us?

Looking forward to your early reply.

*Yours,*

*Li Hua*
